PART I – Foundations of Economics

Chapter 1
The Core Principles of Economics
1.1 A Principled Approach to Economics
1.2 The Cost-Benefit Principle
1.3 The Opportunity Cost Principle
1.4 The Marginal Principle
1.5 The Interdependence Principle

Chapter 2
Demand: Thinking Like a Buyer
2.1 Individual Demand: What You Want, at Each Price
2.2 Your Decisions and Your Demand Curve
2.3 Market Demand: What the Market Wants
2.4 What Shifts Demand Curves?
2.5 Shifts versus Movements Along Demand Curves

Chapter 3
Supply: Thinking Like a Seller
3.1 Individual Supply: What You Sell, at Each Price
3.2 Your Decisions and Your Individual Supply Curve
3.3 Market Supply: What the Market Sells
3.4 What Shifts Supply Curves?
3.5 Shifts versus Movements Along Supply Curves

Chapter 4
Equilibrium: Where Supply Meets Demand
4.1 Understanding Markets
4.2 Equilibrium
4.3 Predicting Market Changes

PART II - Analyzing Markets

Chapter 5
Elasticity: Measuring Responsiveness
5.1 Price Elasticity of Demand
5.2 How Businesses Use Demand Elasticity
5.3 Other Demand Elasticities
5.4 Price Elasticity of Supply
Chapter 6
When Governments Intervene in Markets
6.1 How Taxes and Subsidies Change Market Outcomes
6.2 Price Regulations
6.3 Quantity Regulations

Chapter 7
Welfare and Efficiency
7.1 Evaluating Public Policies
7.2 Measuring Economic Surplus
7.3. Market Efficiency
7.4 Market Failure and Deadweight Loss
7.5 Beyond Economic Efficiency

Chapter 8
Gains from Trade
8.1 Gains from Trade
8.2 Comparative Advantage
8.3 Prices are Signals, Incentives, and Information
8.4 How Managers Can Harness Market Forces

PART III - Applications and Policy Issues

Chapter 9
International Trade
9.1 Comparative Advantage Is the Foundation of International Trade
9.2 How International Trade Shapes the Economy
9.3 The Debate About International Trade
9.4 International Trade Policy
9.5 Effects of Globalization

Chapter 10
Externalities and Public Goods
10.1 Identifying Externalities
10.2 The Externality Problem
10.3 Solving Externality Problems
10.4 Public Goods and the Tragedy of the Commons

Chapter 11
The Labor Market
11.1 The Labor Market: Supply and Demand at Work
11.2 Labor Demand: Thinking Like an Employer
11.3 Labor Supply: How to Balance Work and Leisure
11.4 Changing Economic Conditions and Labor Market Equilibrium
Chapter 12
Wages, Workers, and Management
12.1 Labor Demand: What Employers Want
12.2 Labor Supply: What Workers Want
12.3 Institutional Factors that Explain Why Wages Vary
12.4 How Discrimination Affects Wages
12.5 Personnel Economics

Chapter 13
Inequality, Social Insurance, and Redistribution
13.1 Measuring Inequality
13.2 Poverty
13.3 Social Insurance, the Social Safety Net, and Redistributive Taxation
13.4 The Debate About Income Redistribution

PART IV - Market Structure and Business Strategy

Chapter 14
Market Structure and Market Power
14.1 Monopoly, Oligopoly, and Monopolistic Competition
14.2 Setting Prices When You Have Market Power
14.3 The Problem with Market Power
14.4 Public Policy to Restrain Market Power

Chapter 15
Entry, Exit, and Long-Run Profitability
15.1 Revenues, Costs, and Economic Profits
15.2 Free Entry and Exit in the Long Run
15.3 Barriers to Entry

Chapter 16
Business Strategy
16.1 The Five Forces That Determine Profitability
16.2 Non-Price Competition: Product Positioning
16.3 Bargaining Power of Buyers and Sellers

Chapter 17
Sophisticated Pricing Strategies
17.1 Price Discrimination
17.2 Group Pricing
17.3 The Hurdle Method

Chapter 18
Game Theory and Strategic Choices
18.1 How to Think Strategically
18.2 The Prisoner’s Dilemma and the Challenge of Cooperation
18.3 Multiple Equilibria and the Problem of Coordination
18.4: Advanced Strategy: First and Second Mover Advantages
18.5: Advanced Strategy: Repeated Games and Punishments

PART V - Advanced Decisions

Chapter 19
Decisions Involving Uncertainty
19.1 Risk Aversion
19.2 Reducing Risk
19.3 Behavioral Economics: How People Make Mistakes Around Uncertainty

Chapter 20
Decisions Involving Private Information
20.1 Adverse Selection When Sellers Know More Than Buyers
20.2 Adverse Selection When Buyers Know More than Sellers
20.3 Moral Hazard: The Problem of Hidden Actions
